Innovation Roadmap 2025

Overview

The 2025 R&D agenda focuses on three pillars — AI assistants, data security automation, and green infrastructure.

Target budget allocation = \$5.2 million (+18 % YoY).

Major Projects

- Project ORBIT – autonomous document summarizer based on transformer architecture. TRL 6 → TRL 8 by Q3.
- Project AURA – low-latency vector index for multi-tenant knowledge graphs. Latency goal < 200 ms.
- Project ECO – optimize data-center energy consumption – target 25 % reduction by Q4.

Milestones

Q1 – Prototype validation (benchmarks ≥ 90 % accuracy).

Q2 – Security penetration tests completed.

Q3 – Beta deployment for internal teams.

Q4 – Patent filings + public whitepaper release.

KPIs

- Innovation Velocity Index > 0.75
- Average R&D Cycle Time ≤ 16 weeks
- Patent Conversion Rate ≥ 60 %

Governance

Monthly steering committee reviews progress. All projects use Agile sprints (2 weeks) and JIRA for tracking.
