

KnowServe Corp. — Engineering Department

Code Review Guidelines

Purpose

Ensure code quality, maintainability, and security through a transparent peer-review process.

Scope

All repositories under the KnowServe GitHub organization must undergo at least one peer review before

merging into the `main` branch.

Review Checklist

- Unit-test coverage $\geq 85\%$ for all new modules .
- Cyclomatic complexity per function ≤ 10 .
- No linting errors (flake8 / eslint) .
- All security scanners (Bandit, Dependabot) report 0 critical issues .
- Code comments cover complex algorithms and API endpoints.

Reviewer Responsibilities

Each pull request must be reviewed within 24 hours. Two approvals are required for

high-impact services (authentication, billing). Reviewers leave at least one positive comment

and one improvement suggestion.

Metrics & Compliance

Monthly audits track :

- Average review turnaround time ≤ 18 hours

–Reopen rate < 10 %

–Critical bug post-merge rate < 1%

Training & Continuous Improvement

Engineers attend quarterly review workshops and share best practices on the internal “Code Craft”

portal.
